

## Part One: Getting Started

1. `SELECT * FROM owners o  
FULL OUTER JOIN vehicles v ON o.id=v.owner_id;`
2. `SELECT first_name, last_name,  
COUNT(owner_id) FROM owners o  
JOIN vehicles v on o.id=v.owner_id  
GROUP BY (first_name, last_name) ORDER BY first_name;`
3. `SELECT first_name, last_name,  
ROUND(AVG(price)) as average_price,  
COUNT(owner_id)  
FROM owners o  
JOIN vehicles v on o.id=v.owner_id  
GROUP BY  
(first_name, last_name)  
HAVING  
COUNT(owner_id) > 1 AND ROUND(AVG(price)) > 10000  
ORDER BY first_name DESC;`
